The Hopewell Valley Regional School District has been working to reduce plastic waste in the schools. Their district-wide Green Team has been

championing sustainability efforts including a plastic straw ban and a dramatic reduction in disposable water bottle use.

To augment its e-learning initiatives, HVRSD welcomes the community to join the effort! When you register for this free event, *you will receive a link that allows you to watch the documentary from May 19-21. Get more details by clicking registration link,*

Q&A Panel discussion will be facilitated on May 21st from 4-5pm

Panel members are shown below and feature
Princeton University Director of Environmental Studies. and
FoHVOS Board President *Dr. Dan Rubenstein.*

The [Story of Plastic](#) documentary takes a sweeping look at the man-made crisis of plastic pollution and the worldwide effect it has on the health of our planet and the people who inhabit it. Spanning three continents, the film illustrates the ongoing catastrophe: fields full of garbage, veritable mountains of trash, rivers and seas clogged with waste, and skies choked with the poisonous emissions from plastic production and processing. With engaging original animation, archival industry footage beginning in the 1930s, and first-person accounts of the unfolding emergency, the film distills a complex problem that is increasingly affecting the planet's and its residents' well-being.

You are invited to the film and participate in a follow up conversation with local environmental leaders on Thursday, May 21, 2020, from 4-5 pm. [Click here to RSVP to this free event.](#)
